

1. Create a simple online quiz system database where students can answer multiple-choice questions. Name the database "revision_db". Name the table "quiz". Use the information provided below to create your database.

Column Name	Data Type	Description
id	INT AUTO_INCREMENT	Primary Key
question	VARCHAR(255)	The quiz question
option_a	VARCHAR(100)	First answer option
option_b	VARCHAR(100)	Second answer option
option_c	VARCHAR(100)	Third answer option
option_d	VARCHAR(100)	Fourth answer option
correct	CHAR(1)	Correct option (A/B/C/D)

2. Enter some dummy data and use php to display the questions in the browser. Name your file index.php. Data should be displayed as below:

Question 1: What is the capital of France?

A. Berlin

B. Madrid

C. Paris

D. Rome

Correct Answer: C

Question 2: Which planet is known as the Red Planet?

A. Earth

B. Mars

C. Jupiter

D. Saturn

Correct Answer: B

3. Create a PHP script that allows the user to input a new quiz question into the `questions` table. Name the file questions.php

- a. The script should display an HTML form for entering the question, four answer options (A, B, C, D), and the correct answer.
 - b. When the form is submitted, the same file should process the input and insert the new question into the database.
 - c. If any field is empty, display an error message **from server-side** (not just using a required attribute!).
 - d. Show the form and any success or error messages on the same page.
4. Use bootstrap to display the form as shown below:

Question**Options****Correct Answer**

5. Add another functionality in index.php to remove a question. This should be in the form of a link which redirects to a delete.php file thus remove the current question. The last part of the URL should be as follows:

/delete.php?id=1

You can use the below code as help

```
<a href="delete.php?id=<?php echo $row['id']; ?>">Delete</a>
```

Question 1: What is the capital of France? [Remove](#)

- A. Berlin
- B. Madrid
- C. Paris
- D. Rome

Correct Answer: C

Question 2: Which planet is known as the Red Planet? [Remove](#)

- A. Earth
- B. Mars
- C. Jupiter
- D. Saturn

Correct Answer: B
